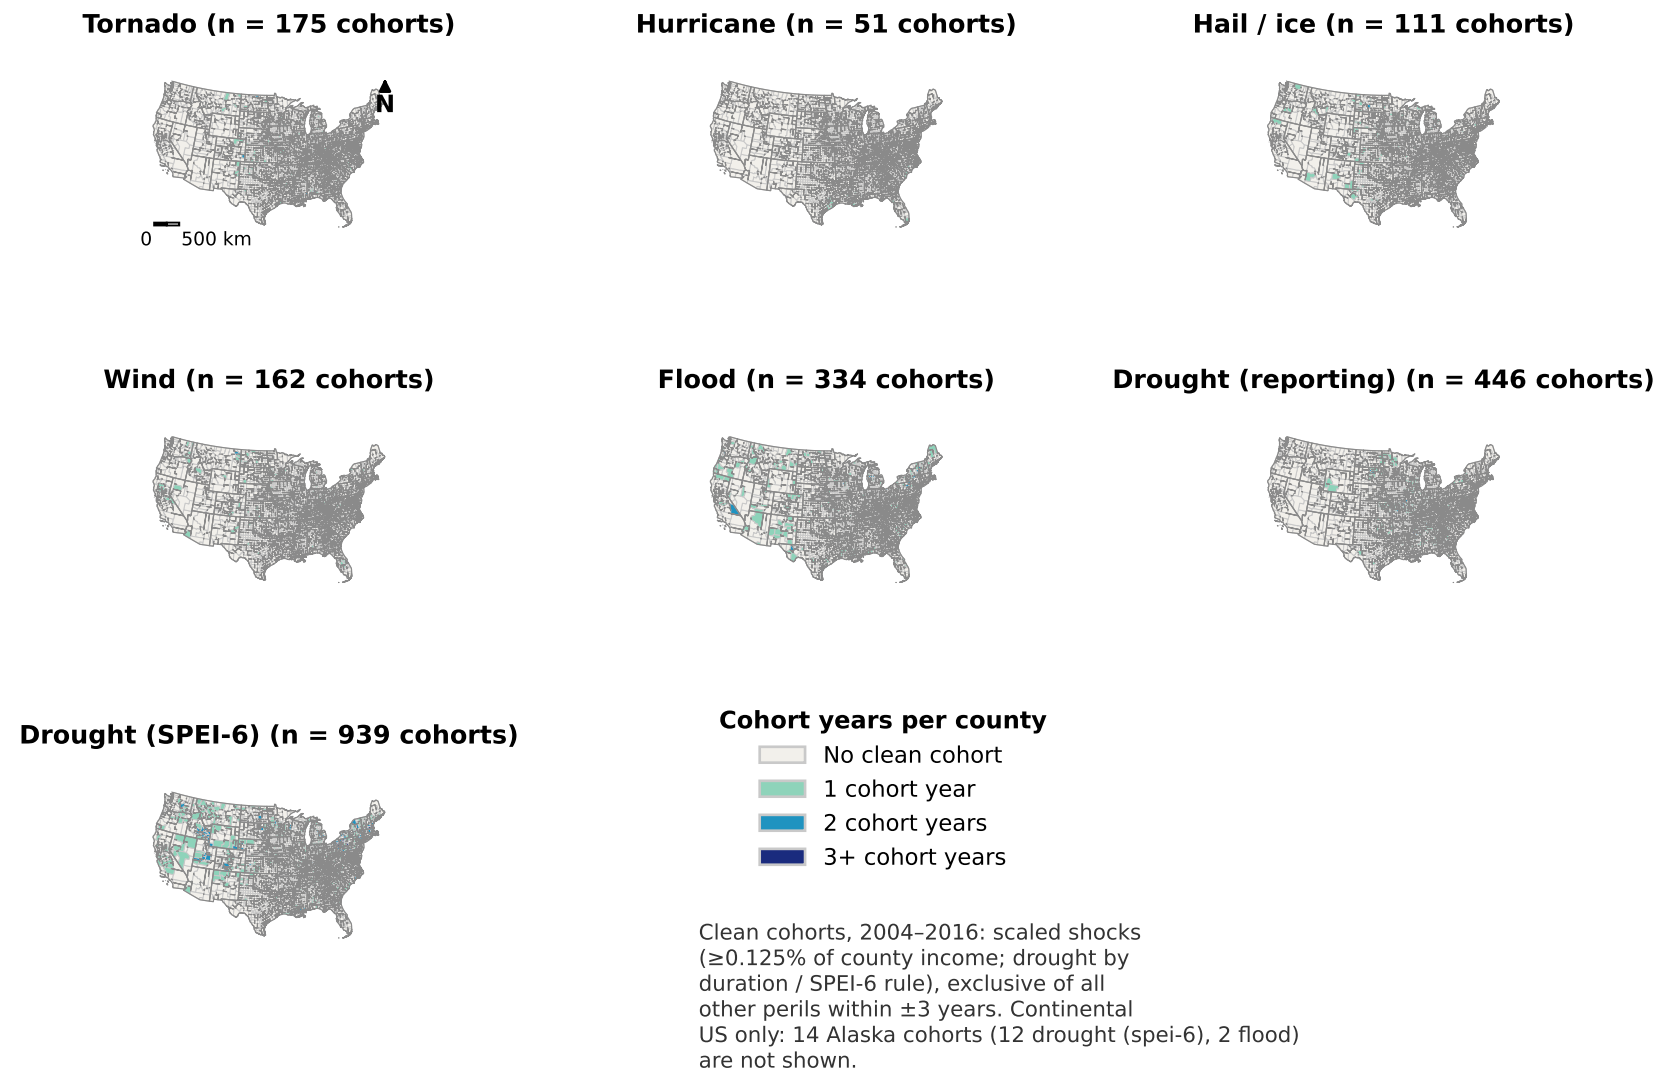

## Figure 1. Geography of the clean cohorts, by peril

Clean cohorts, 2004–2016: scaled shocks (≥0.125% of county income; drought by duration / SPEI-6 rule), exclusive of all other perils within ±3 years. Continental US only: 14 Alaska cohorts (12 drought (spei-6), 2 flood) are not shown.

Source: Cohort locations, results/cohort_locations.csv (code/run_all.py). Boundaries: US Census Bureau cartographic boundary file cb_2023 (500k), Albers Equal Area (EPSG:5070). Scale bar and north arrow on first panel.
